

Tissue Stain

- BLEEDER GOITS

- Make Membrane more Disk-like

Makes a darker shade of same color

Rep pill = ROTENONE.

WANTS Everything in The Existing / weeks Animation

Slow weekly Animation 1st

+ Doesn't need as much detail on ATP synthase AND cell membrane structure

- NADH goes into 1st Blob
Can I make key/notch type design (lock + key)

FADH2 Goes into 2nd (tiny) Blob. yellow in Animation
Leave electron transporters in there

~~Doesn't need the 2 enzymes that shuffle electrons back and forth.~~

- Show higher electron concentration in high concentration area (essentially flipping existing animation)

- look at BREAK image for illustration ex.
